

This tutorial is my steps that worked for me, hope its works with you as well :D

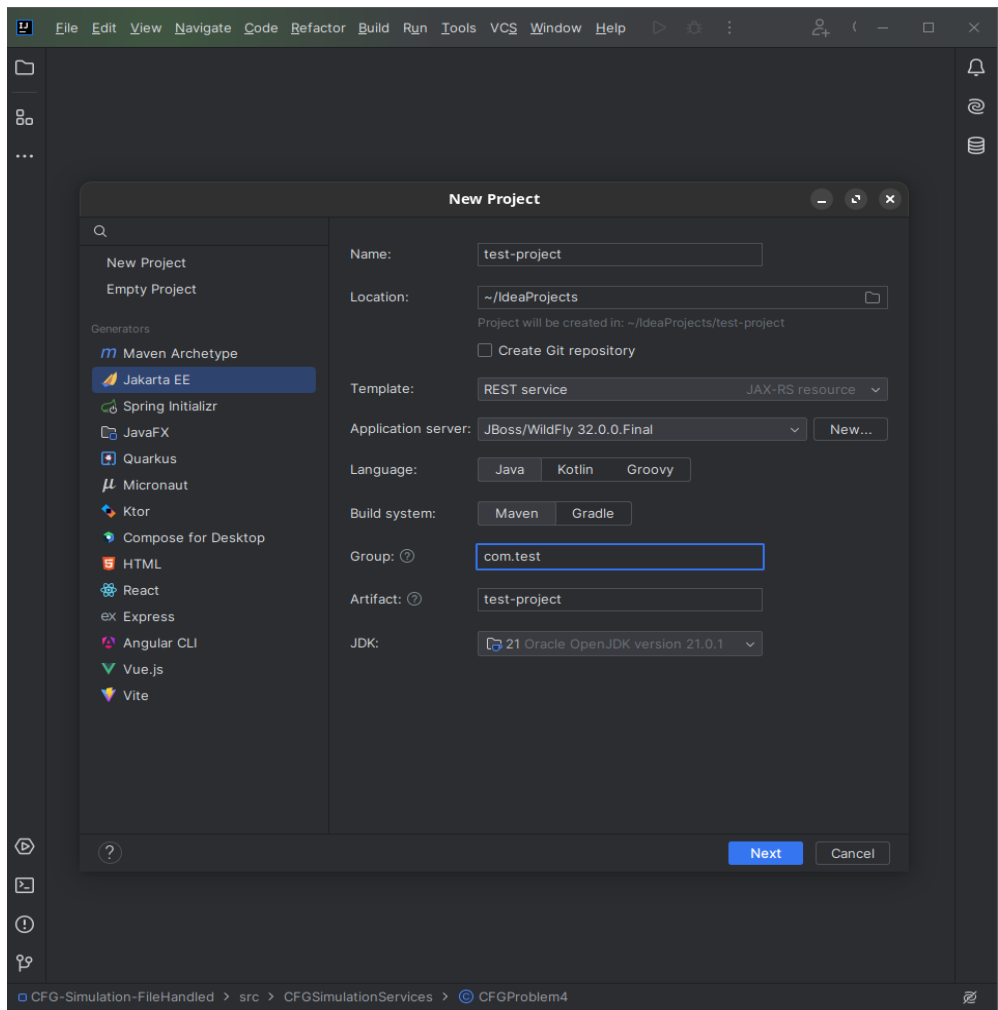

1 - Download wildfly server 32.0.0 Final version

Link : <https://www.wildfly.org/downloads/>

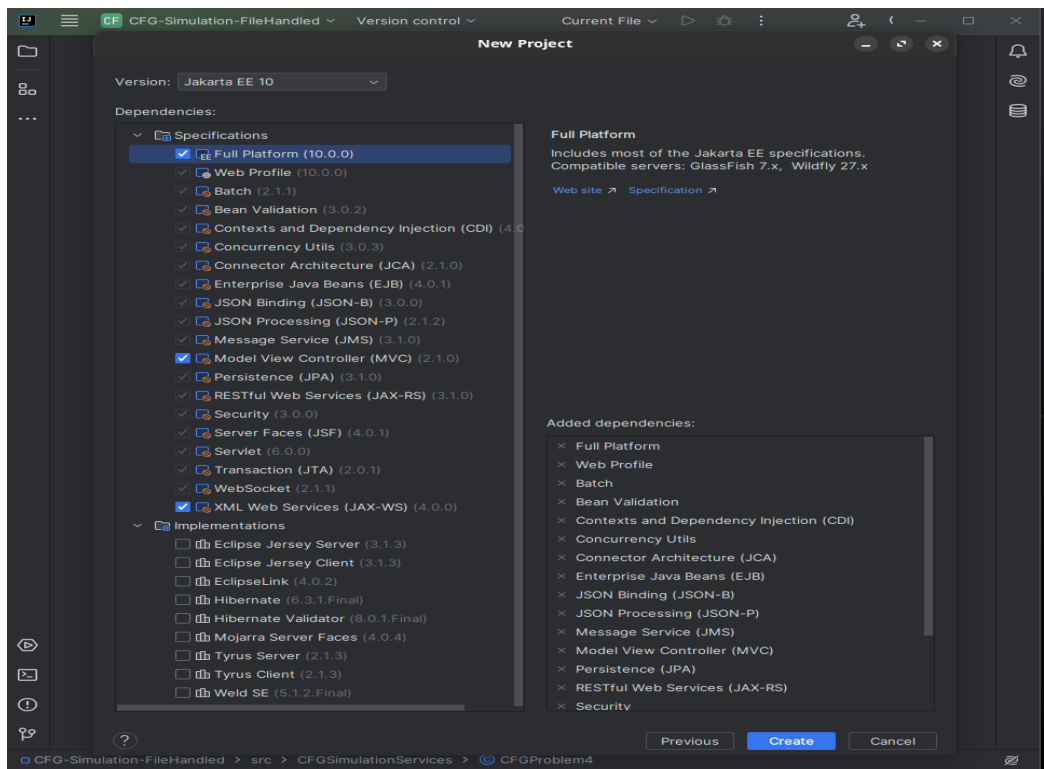

2 - Open IntelliJ Ultimate and choose Jakarta EE generator

3 - unzip the wildfly server and choose it in the Application Server with template rest service

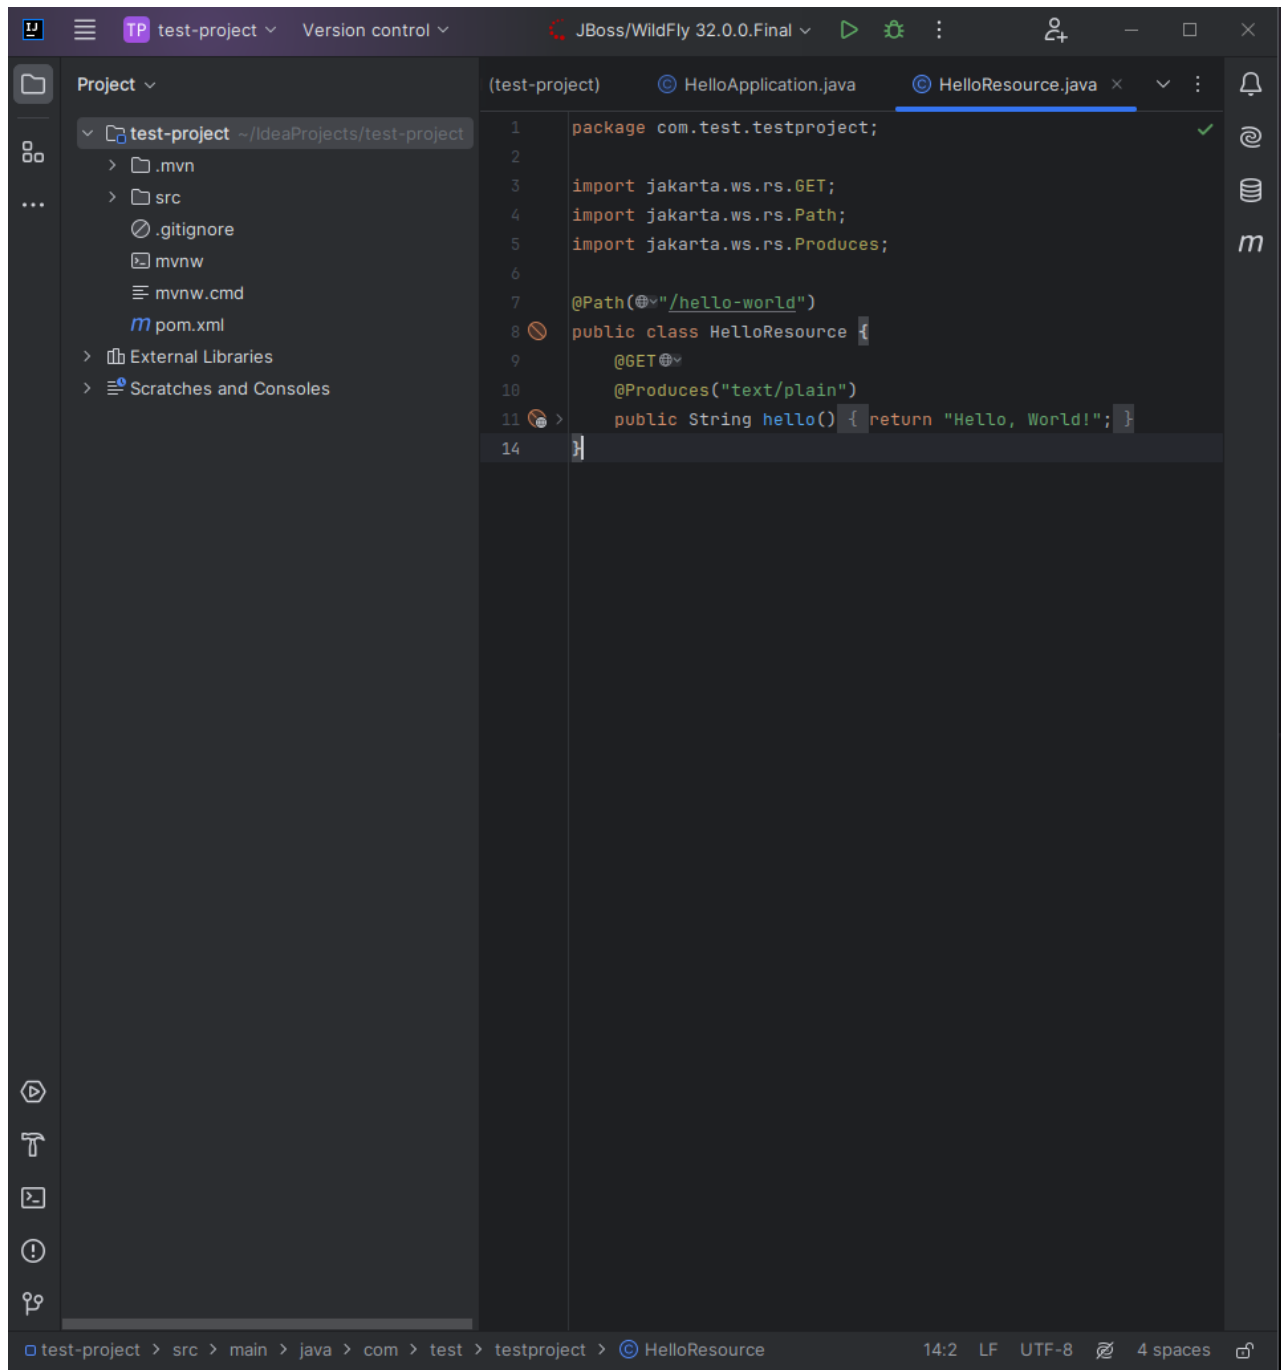

4 - Click Next to go to the dependencies and select version Jakarta EE 10 with the full platform spec as shown below in the picture

5 - Click Create icon as shown above:

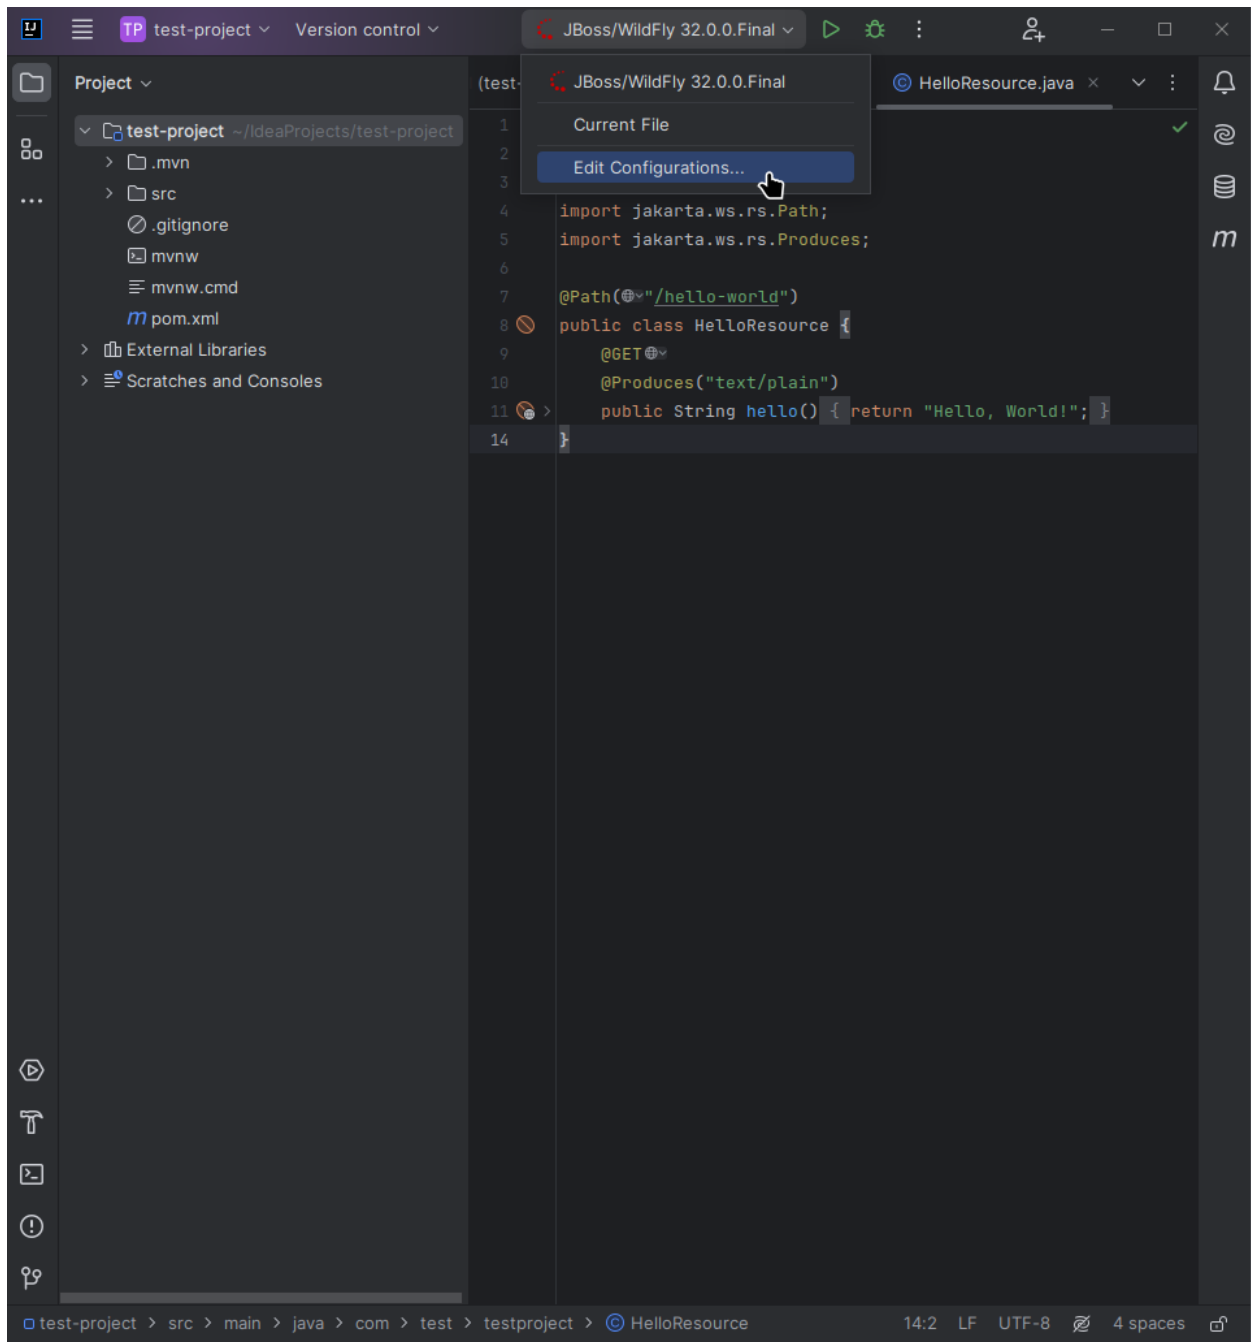

then this welcome page appears

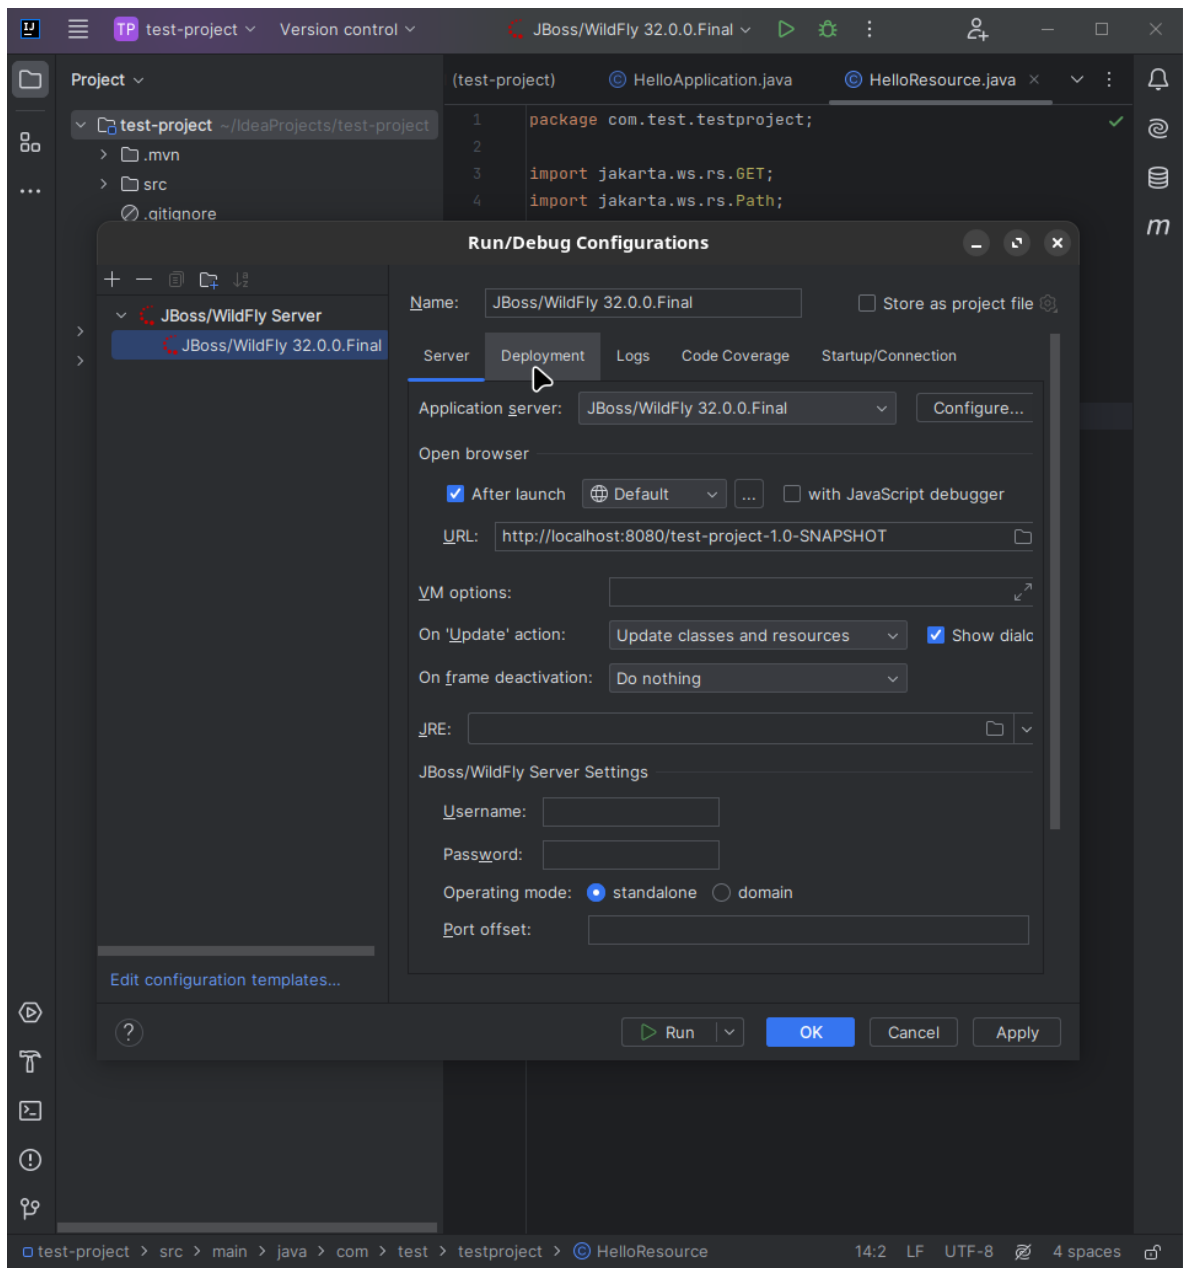

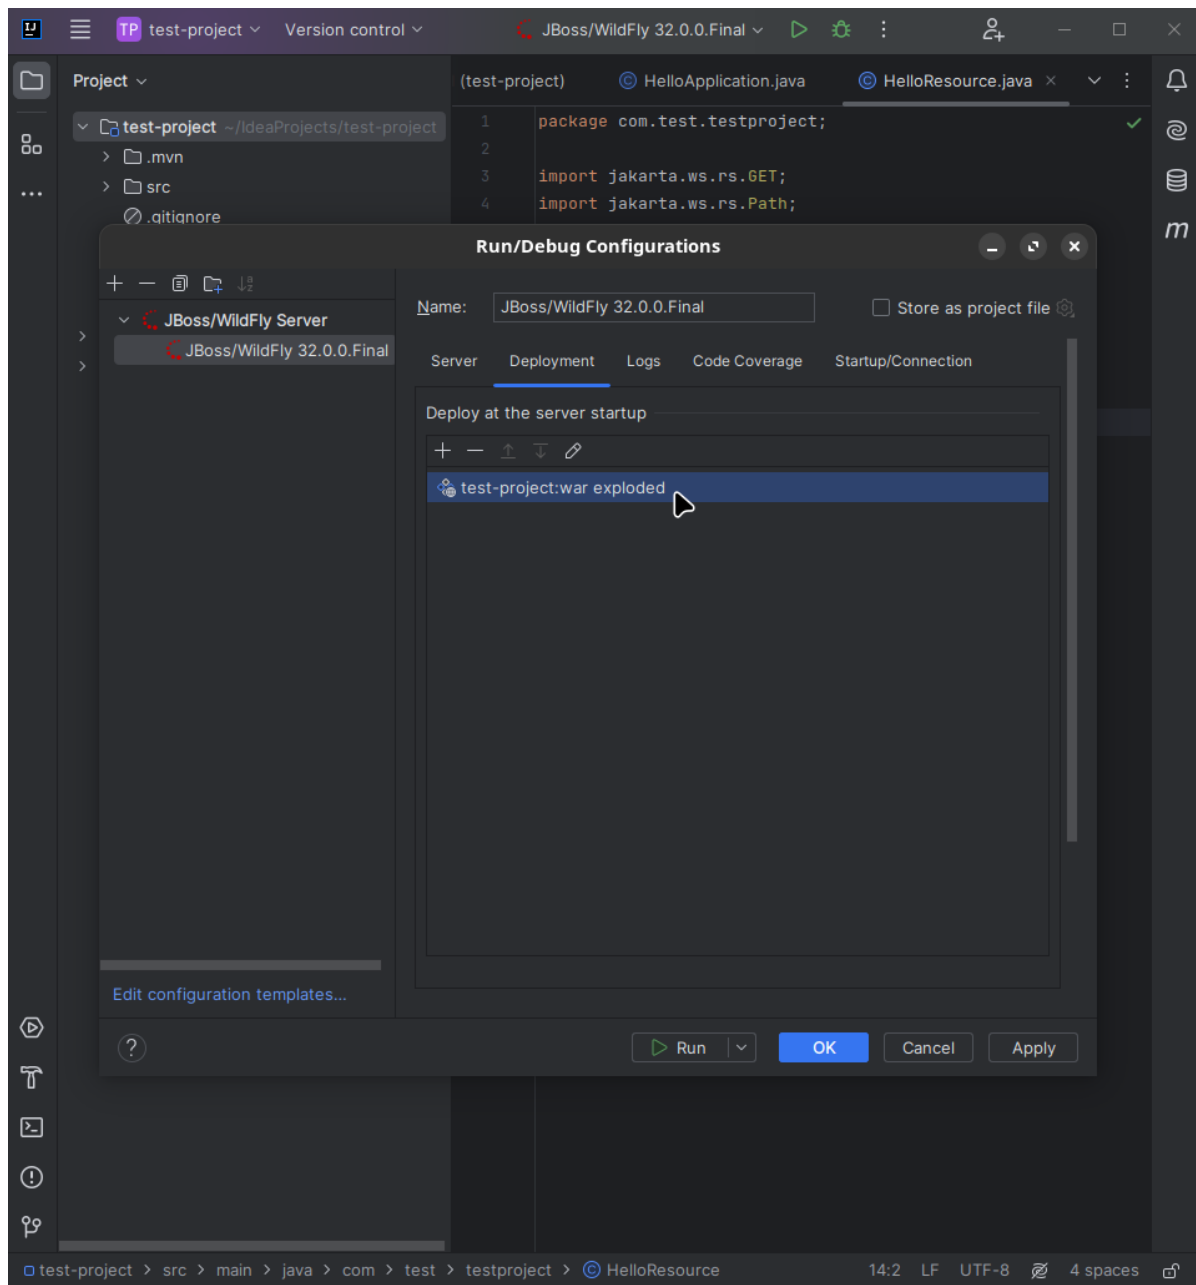

6- Note: I didn't edit in the pom.xml file, the below pics is the step-by-step to run the test-project

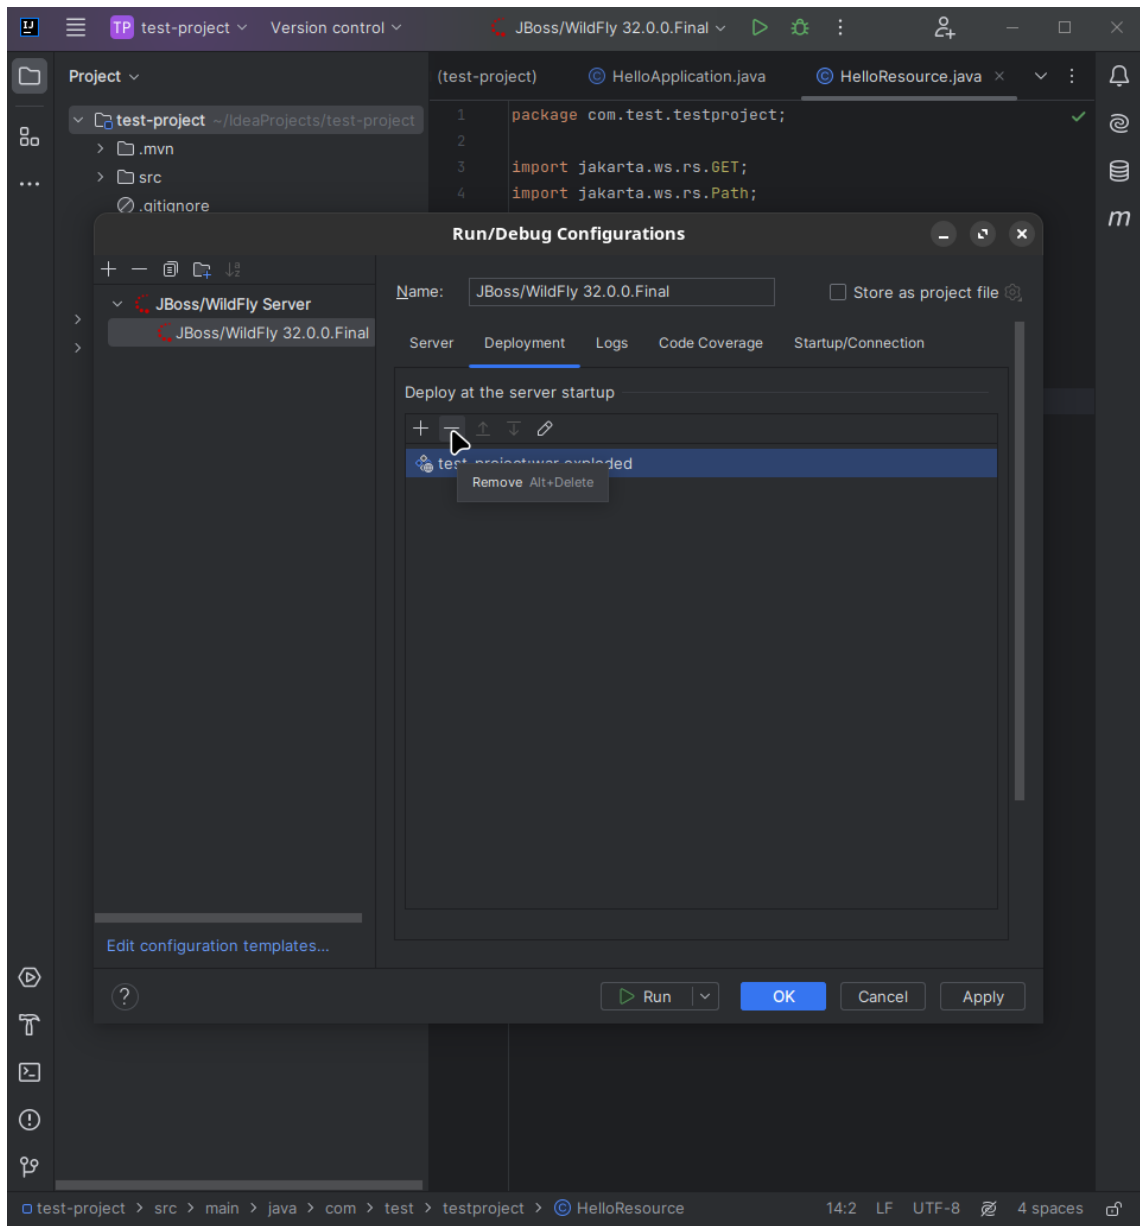

Note: if you got forbidden, it means all is good, redirect to:

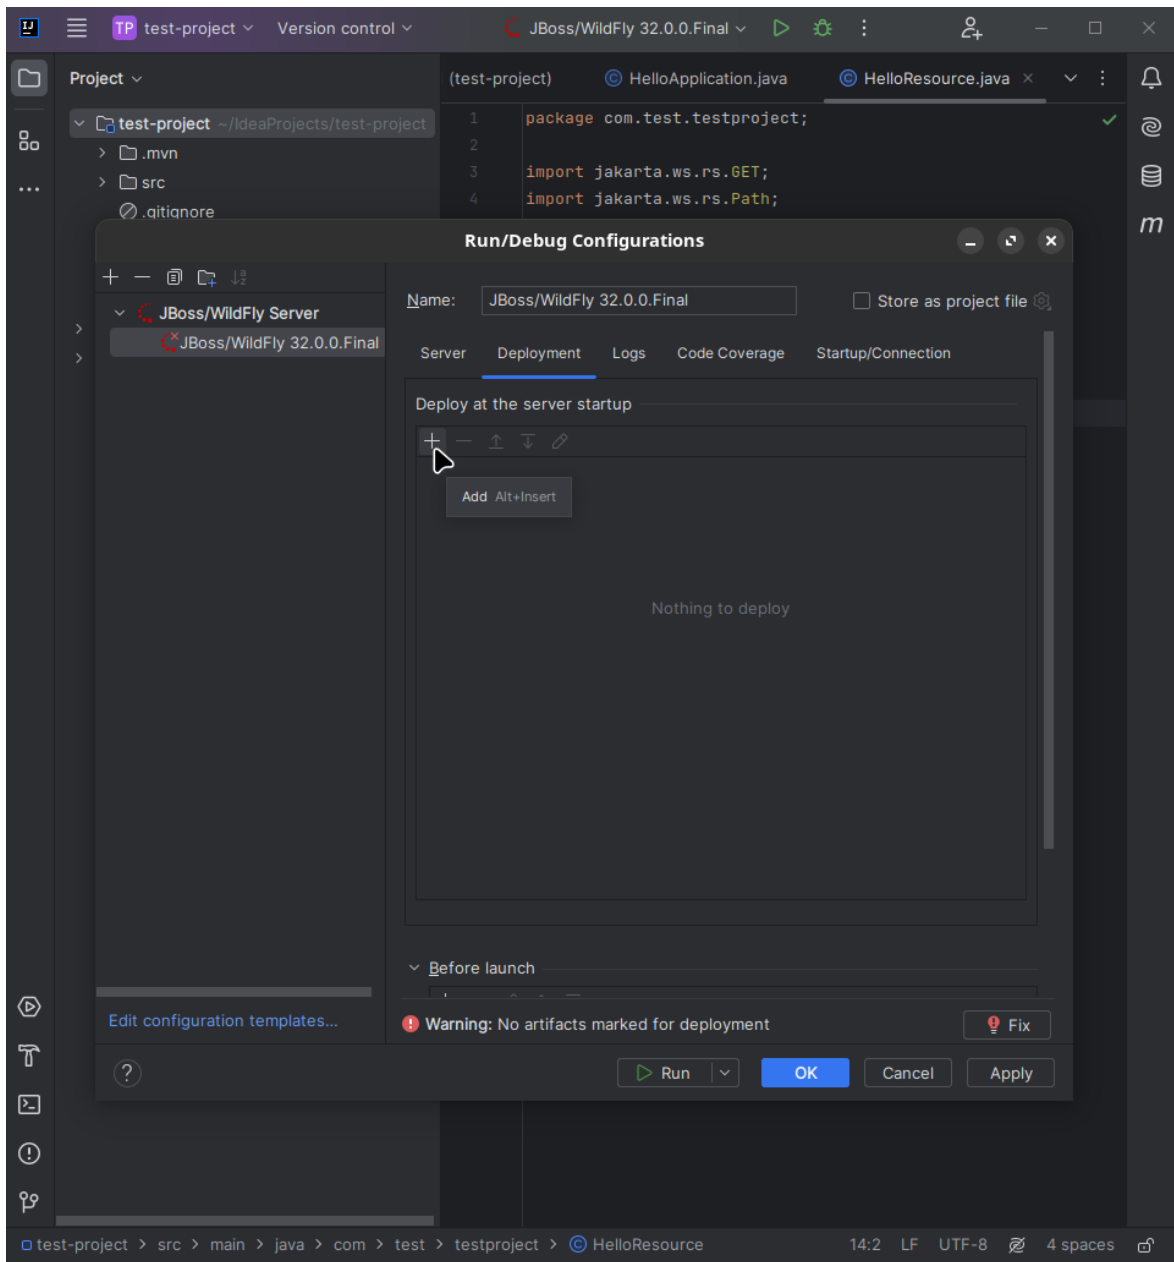

<http://localhost:8080/test-project-1.0-SNAPSHOT/api/hello-world>

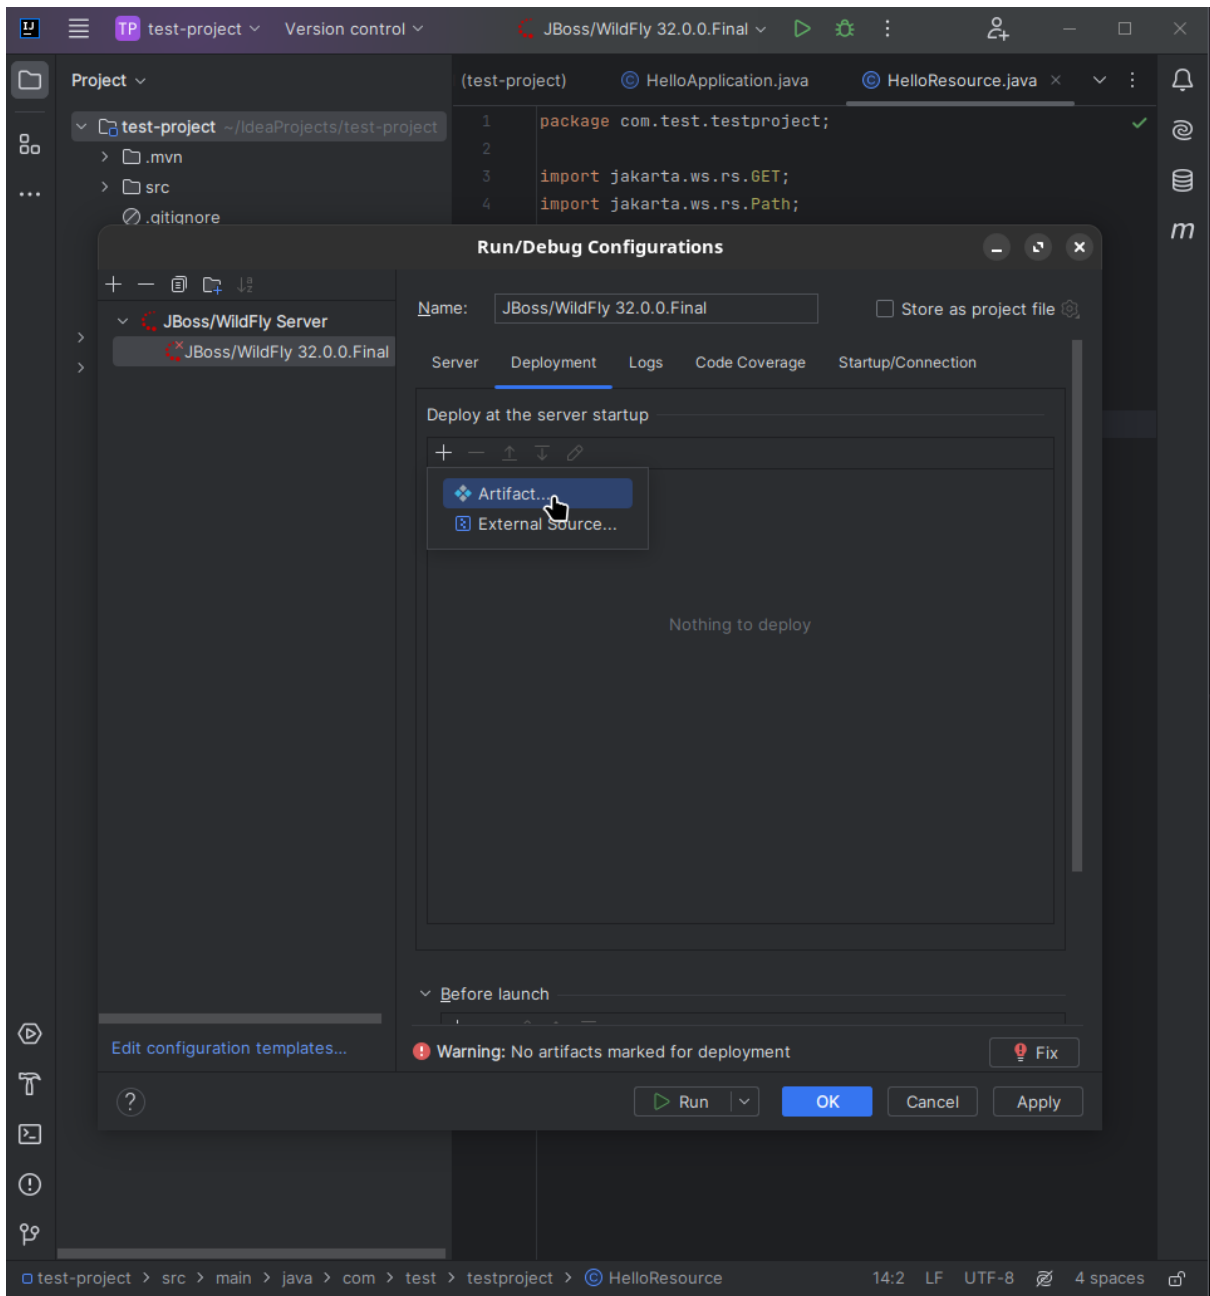

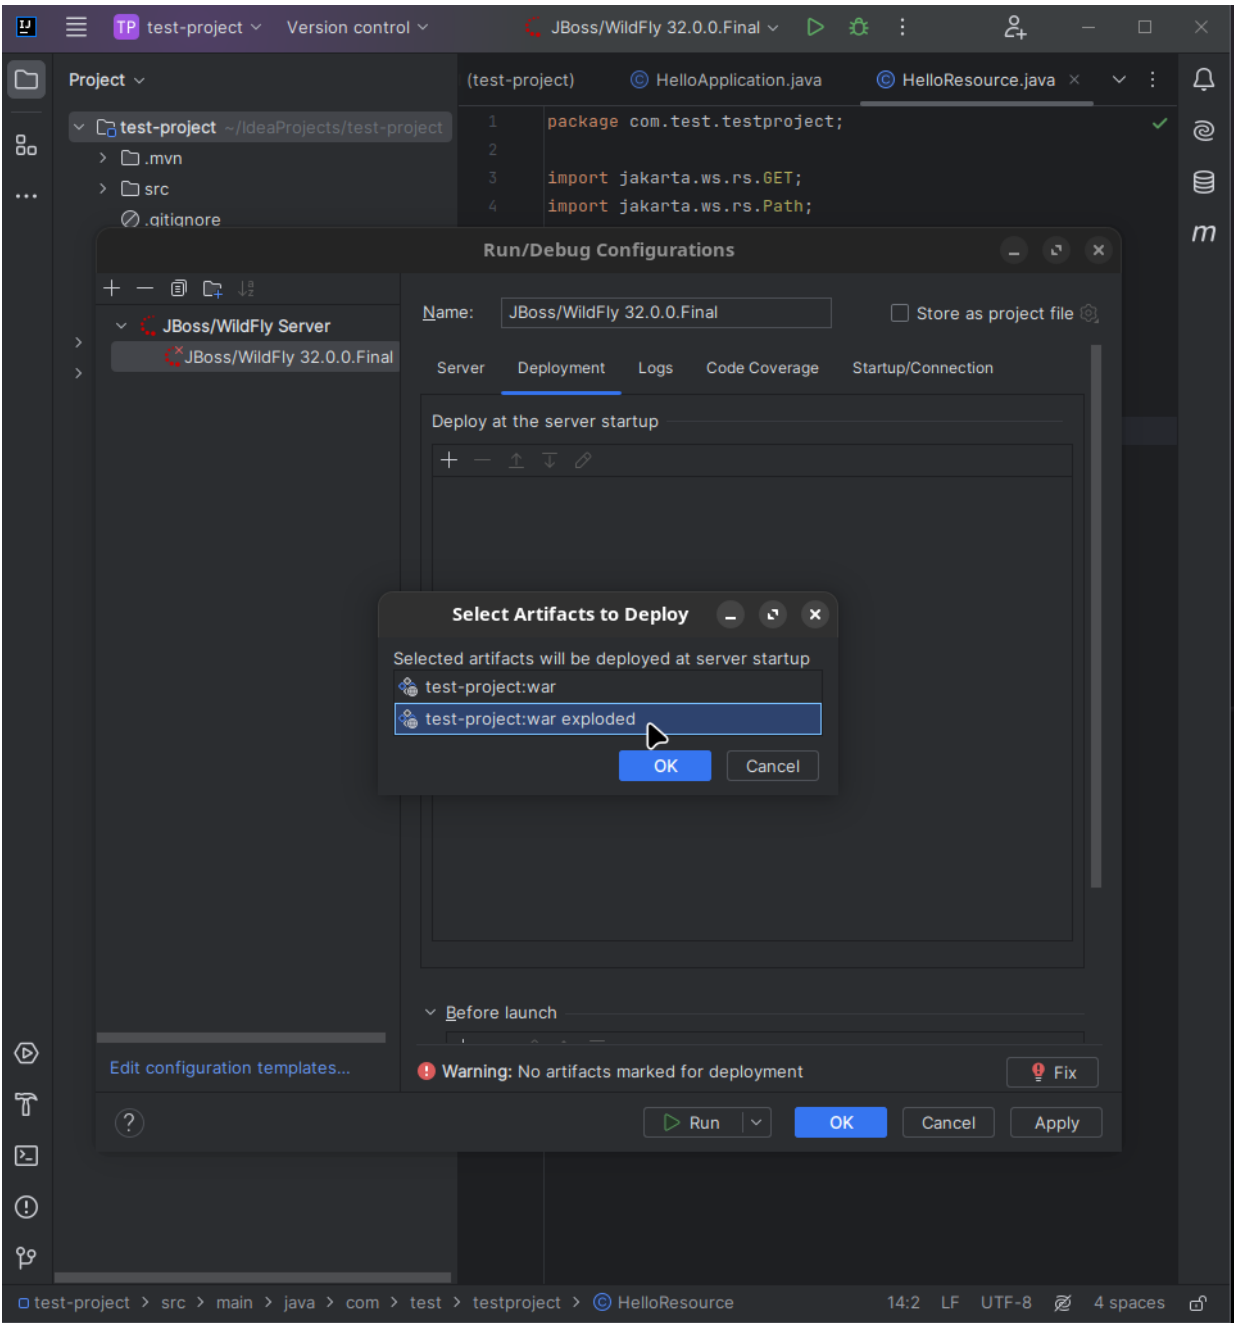

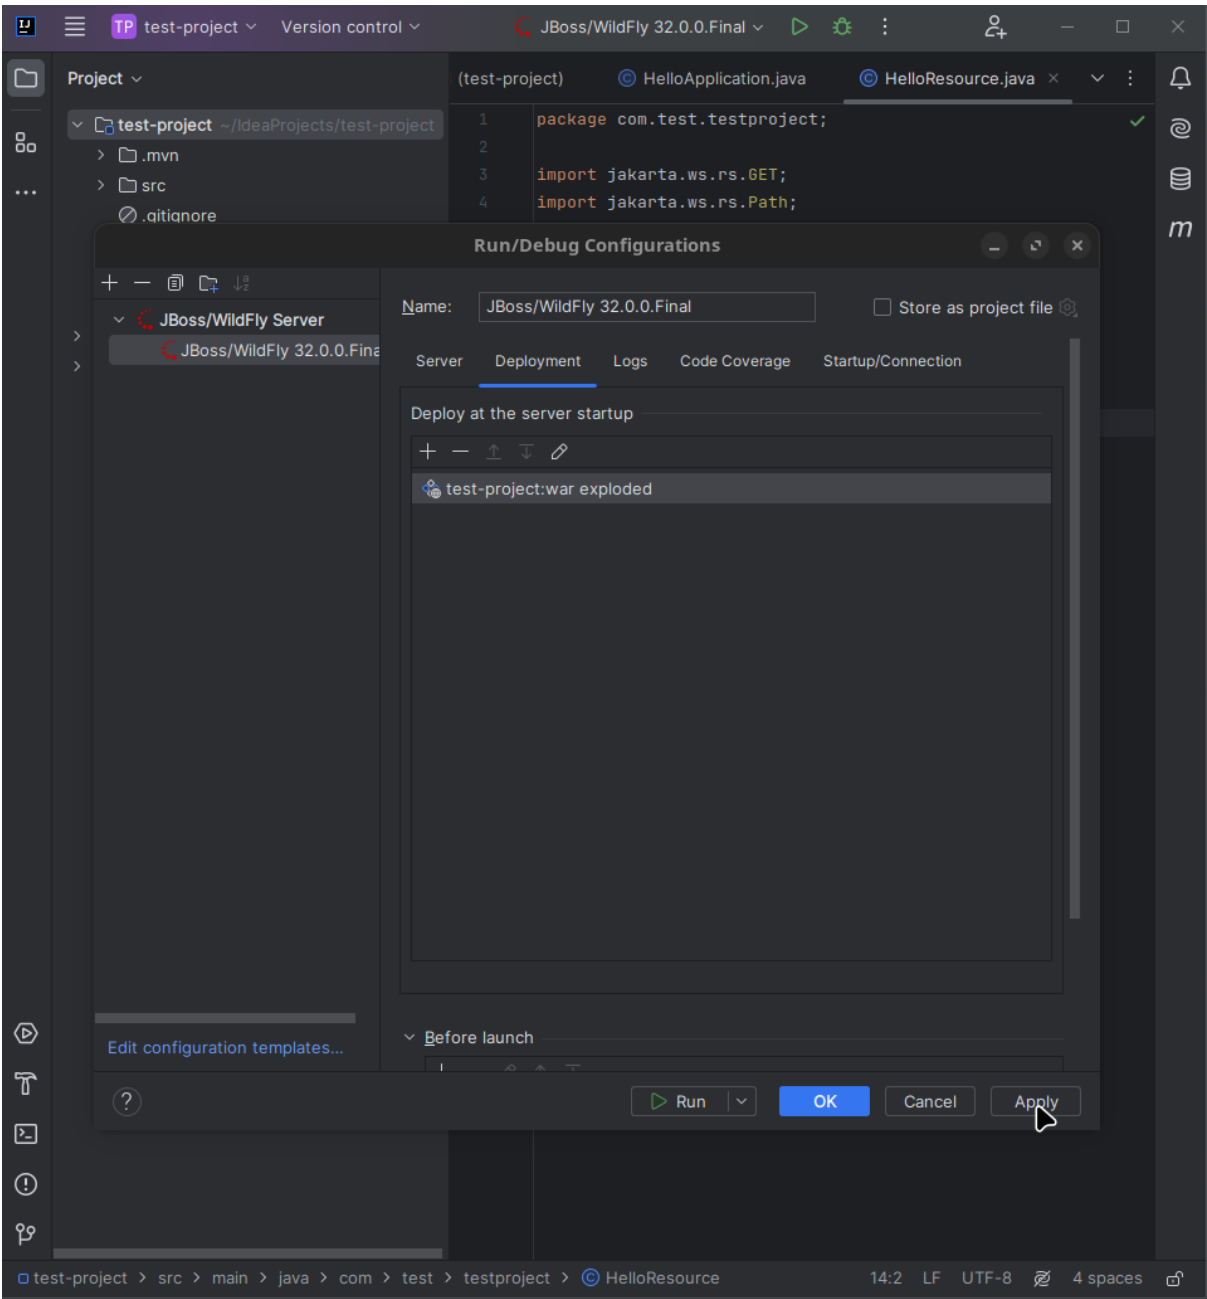

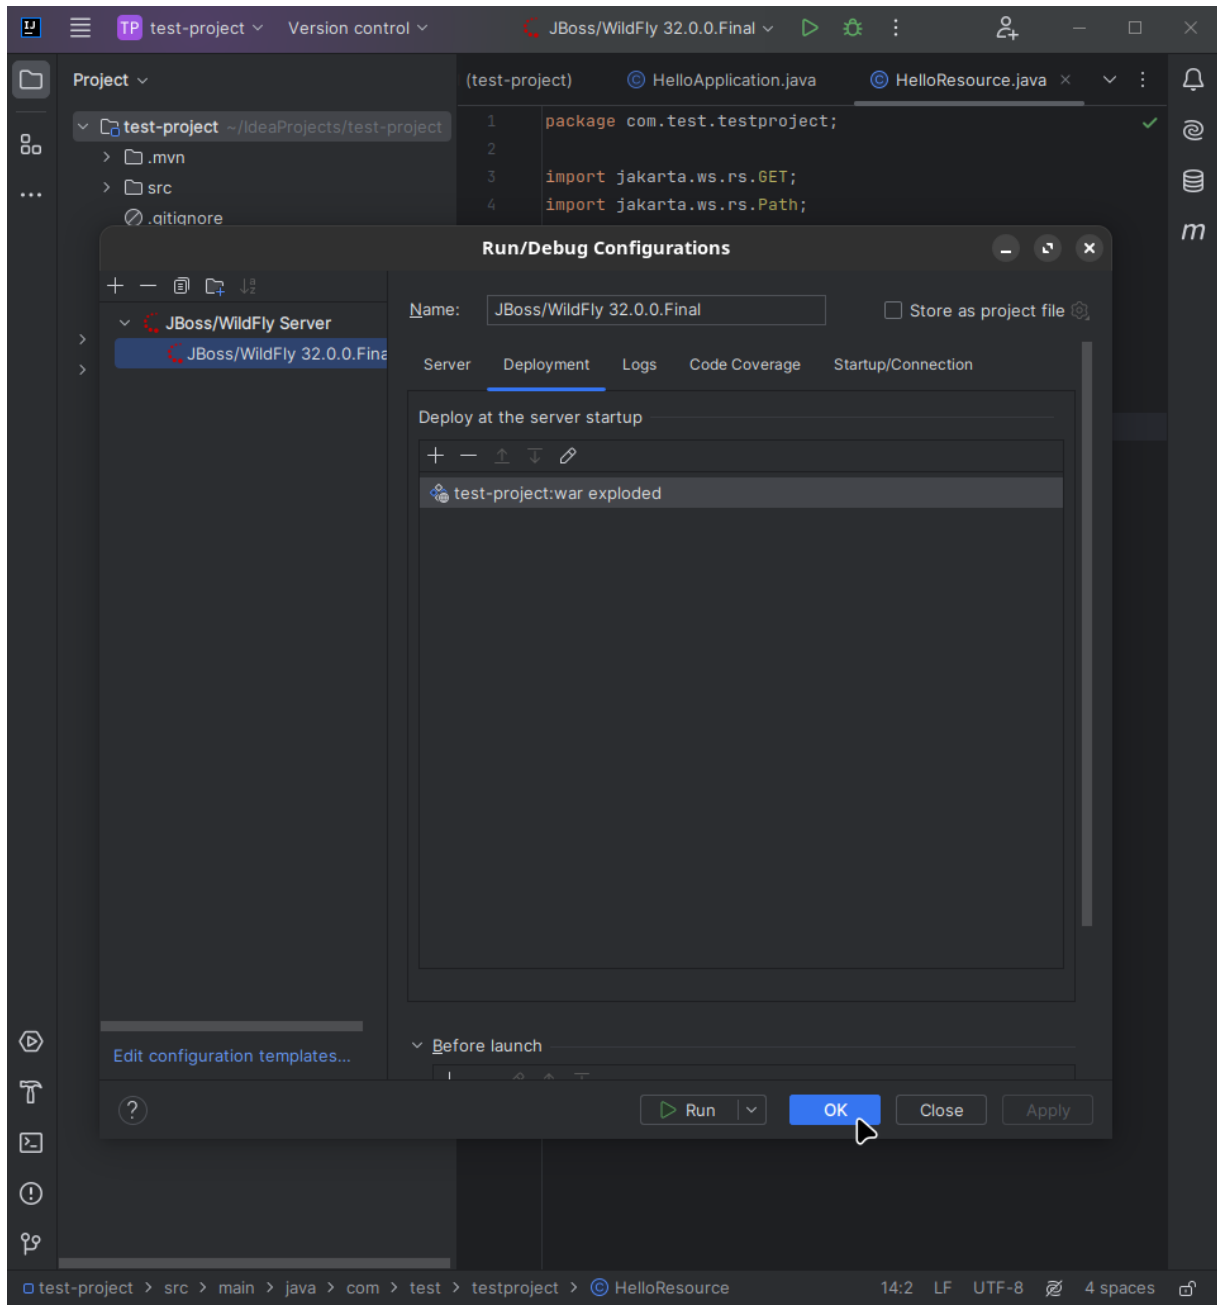

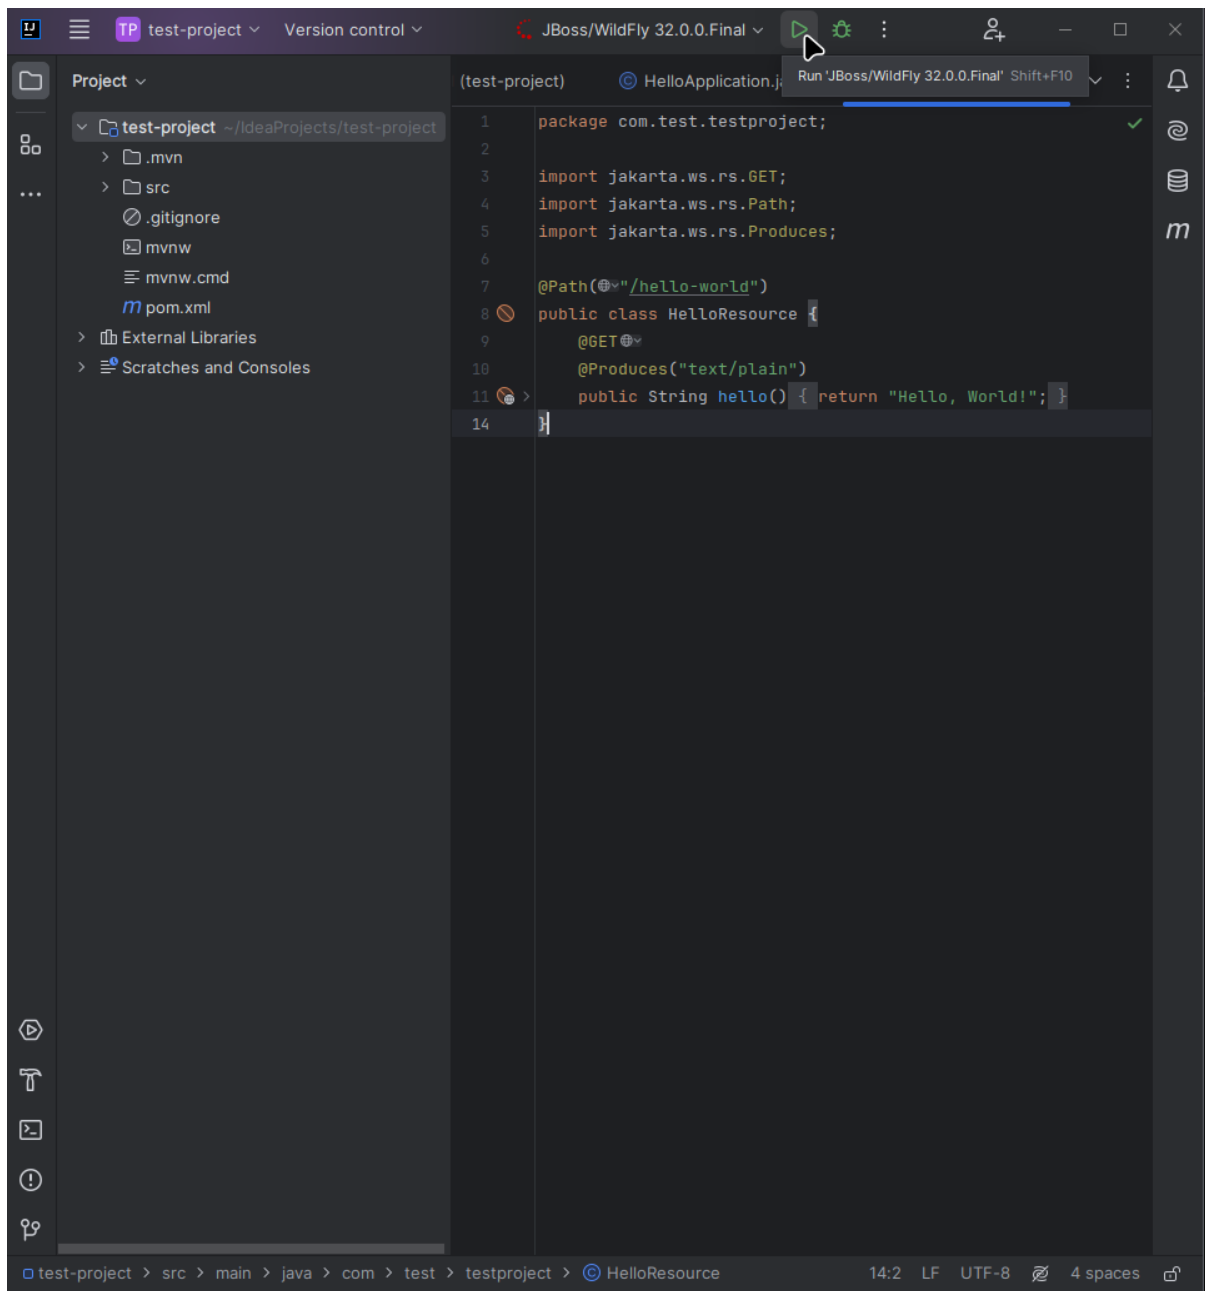

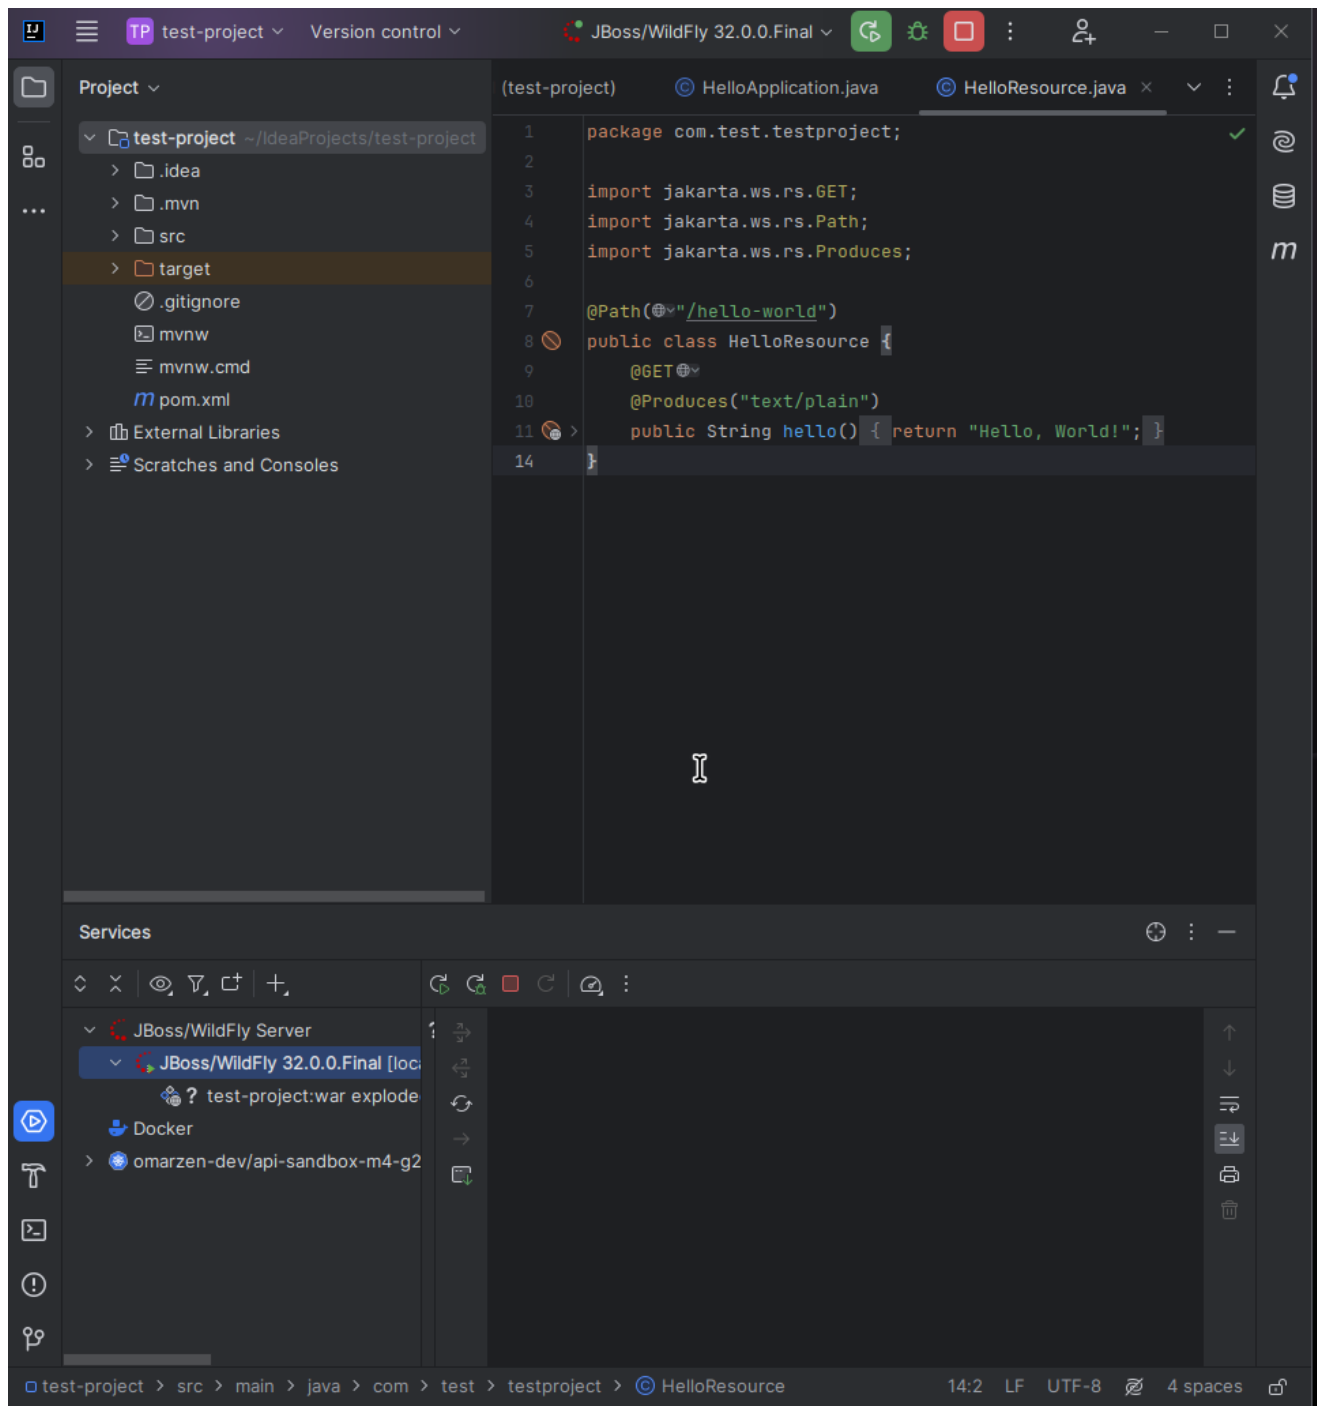

test-projectVersion controlJBoss/WildFly 32.0.0.Final

Projecttest-project ~\IdeaProjects\test-project
